

Testimonials

Professor Sir Keith Peters
Chairman, Cambridge University
Health Partners

The combination of fundamental exploration of biology and the testing of new methods of diagnosis and treatment make this one of the most attractive centres in the world to conduct medical science.

Dr Venkatraman Ramakrishnan
Medical Research Council

World class research depends on excellent facilities and long term support. The fundamental research conducted on the CBC today not only increases our understanding of life but also lays the foundations for the translational research of tomorrow.

Professor Sir Bruce Ponder
Director, Cancer Research UK
Cambridge Research Institute

This is the ideal location to tap into a wide range of excellent science and bring it to application through our cancer centre.

Dr Mary Archer
Chairman, Cambridge
University Hospitals

CBC is research, teaching and clinical care on a grand scale... it's one of the largest and most internationally competitive concentrations of health-related talent and enterprise in the world.

Professor Patrick Sissons
Regius Professor of Physic
Director, Cambridge University
Health Partners

The partners on the Cambridge Biomedical Campus are committed to the highest quality biomedical research, and its translation in to new treatments and improved healthcare. This major expansion of the campus brings opportunities for exciting new partnerships, enabling us to make even faster progress towards these common goals.

Professor Steve O'Rahilly
University of Cambridge

This is a wonderful environment in which to pursue our research. It provides, on a single site, superb facilities for both basic and clinical research and ready access to world-leading expertise across a broad range of disciplines.
